**\*Biological Sciences: Please note, you must complete a minimum of 8 hours of biological sciences. It's most typical a biological science will be four hours but the credit hours could vary based on the course. As long as you have a total of 8 hours, regardless of the number of biological science courses, that will be acceptable.**

1. These are minimum requirements. We highly recommend, if possible, applicants also successfully complete a biochemistry course, at least one upper-level science, both human anatomy and physiology, and statistics. Our first preference is for physiology if a student is unable to take both anatomy and physiology.
2. In order to best be prepared for the PCAT, it is highly recommended that prior to taking the exam, applicants complete general biology, microbiology, at least either human anatomy or human physiology, and at least Organic Chemistry I.
3. Approved Elective Subject Areas: Fine Arts (non-performance based), History, Political Science, Anthropology, Humanities, Geography, Philosophy, Literature, Social Science, Behavioral Science, Foreign Language, Communications, English, Business (may include management, marketing, economics, accounting), Computer Science, Statistics, General Studies, Leadership. Students are expected to have a computer proficiency level at or above basic word processing skills. Students are encouraged to select a diverse set of courses as preference is given to those with a broad-based educational background that includes a diversity component.
