

Audience Response System Instructions

Completion of a learning assessment is a requirement to receive ACPE continuing education credit for each individual activity. Each of the presentations today will have pre- and post-assessment questions, case studies or other prompts embedded to enhance and assess active learning. To record answers, we will be utilizing an audience response system, Poll Everywhere. This program allows you to participate via your smart phone and see the audience responses in real-time. Please follow the instructions below before the start of the first activity.

1. Text **OU321** to the five digit number **37607** to join the session. This only needs to be completed once per day. You will be able to respond to all the active prompts you see in the presentations today after completing this step.
2. When a multiple-choice poll appears on the screen, you can respond by texting one of the provided options (usually A, B, C, D, etc.) to the same text message thread. If open-ended questions or word clouds appear, you can respond by texting in your full response.

- You do not need to download anything
- Please remember to keep your phone on silent
- Standard text messaging rates apply

For questions or assistance, please contact Cassidy-Roberts@ouhsc.edu or (405) 271-6194 before the start of the first activity so that you can successfully join the session and actively participate in the presentation(s).
